## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 15 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 11-13 drawn to a method for treating a condition comprising administering an effective dose of alpha-MSH and/or EPO to the individual in need thereof, classified in class 514, subclass 2.
- II. Claims 1-3, 5, 11 and 14 drawn to a method for treating a condition comprising administering an effective dose of alpha-MSH and/or EPO to the individual in need thereof, classified in class 514, subclass 2.
- III. Claims 1, 2 and 15, drawn to a method for treating a condition comprising administering an effective dose of alpha-MSH and/or EPO to the individual in need thereof, classified in class 514, subclass 2.
- IV. Claims 1, 2, 3, 11 and 16, drawn to a method for treating a condition comprising administering an effective dose of alpha-MSH and/or EPO to the individual in need thereof, classified in class 514, subclass 2.

Groups I-IV are directed to methods that encompass treating different patient populations. The Groups require search and consideration of diverse diseases, conditions and techniques, which may not overlap. For example coronary artery disease exhibits a different pathology versus diabetes mellitus. A search on graft transplants would not necessarily overlap with hypotension. Therefore, a search and examination of the methods in one patent application would result in an undue burden,

Art Unit: 1647

since the searches for the methods are not co-extensive, the classification is different, and/or the subject matter is divergent.

In addition:

Claim 2 is generic to a plurality of disclosed patentably distinct species comprising different organs. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claim 13 is generic to a plurality of disclosed patentably distinct species comprising different conditions. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claim 14 is generic to a plurality of disclosed patentably distinct species comprising different conditions. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claim 15 is generic to a plurality of disclosed patentably distinct species comprising different conditions. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1647

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, separate search requirements, and/or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Regina M. DeBerry whose telephone number is (703) 305-6915. The examiner can normally be reached on 9:00 a.m.-6:00 p.m..

Art Unit: 1647

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Kunz can be reached on (703) 308-4623. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
